Universidad Mayor

University Technician in Cybersecurity.

March 2024 - Present

Coding Dojo

Full-Stack Javascript/MERN Bootcamp.

January 2022 - May 2022

Amazon Web Service and Coding Dojo

AWS/re start.

July 2021 - November 2021

WORK EXPERIENCE

Front End Developer & UX/UI Designer at Grow Cloud SpA (Chile, Remote). February 2023 – Present

Description: Highlighted experience in prototype design using Figma and delivering UX documentation. Specialized in developing websites in React, from landing pages to complex applications like Lizilib. My versatile approach has been based on implementing a variety of cutting-edge technologies widely recognized in the current market. This has ensured the delivery of innovative and high-quality results in every project I have carried out at GrowCloud SpA.

Front-end Developer at RevenueHunt (Project) (United Kingdom, Remote). March 2024 – April 2024

Description: Responsible for developing the user interface (UI) in Remix-app in collaboration with Shopify Polaris, focusing on backend integration and following design in Figma. Responsible for implementing a product recommendation platform through quizzes (Quiz), with a functionality that allows users to manage their Quiz similar to a system in Shopify.

Front End Developer (Project) at Desafío Latam.

December 2022 – April

2023

Description: Integrated UI components with APIs and databases. Implemented scalable and responsive user interfaces, debugging, and troubleshooting for the DLAB program project (Project).
